

Cheng et al. - Harvard Dataverse evidence record

Archive date: August 24, 2026

Capture type: Local evidence PDF generated from the live indexed Dataverse record and independent catalog metadata

Resolving URL: <https://dataverse.harvard.edu/dataset.xhtml?persistentId=doi%3A10.7910%2FDVN%2FCQCKBF>

Earliest relevant public date: August 11, 2022

Observed evidence

The Harvard Dataverse indexed record identifies V1.0 of the dataset titled "Strict version dataset for the appendix in 'How New Ideas Diffuse in Science'" as public and published August 11, 2022. The record resolves to DOI 10.7910/DVN/CQCKBF.

Audit classification significance

This is affirmative evidence that article-associated public material existed before Cohen's January 2024 audit. It therefore creates a classification discrepancy with the audit table's "Nothing" label, although it does not by itself establish a full replication package.

Archival note

The live Dataverse HTML page is dynamic. This PDF preserves the resolving DOI, title, public-status finding, and indexed publication date rather than a byte-for-byte webpage snapshot.
